

Sustainability Policy

for
VARTA Consumer Batteries GmbH & Co. KGaA

We are aware of the responsibility of our company to contribute to a sustainable future where future generations can live a life that is worth living, fulfil their own needs and choose their way of living.

We integrate sustainability considerations into all our business decisions - be it in production, transportation or other functions.

We focus on the sustainability impact of our decisions especially on waste and emissions, health and social issues. We optimise the impact of our processes and products.

We pro-actively inform all stakeholders including our employees, suppliers and customers about our sustainability programme and encourage them to adopt practises which support our initiatives. We make sure that suppliers adopt sound sustainable management practices which are in line with our requirements.

We regularly review, report and improve our sustainability performance.
